modular pontoon

## MARINEFLOOR® JETFLOOR SYSTEM

The new jet-ski dock JETFLOOR SYSTEM is specially designed and developed for the latest generation of jet-skis...

Equipped of two half-entrance ramps, also left and right, the drive-on is facilitated by the engine thrust, without any blockage or impact.

Each half-slider and half-ramps are provided of a shockproof roll, allowing the jets to move forward or backward easily.

In addition, a screwed cork is available on each half-slider and half-entrance ramp upper part in order to allow filling and lower the entrance.

The system works for every application: sea, beach, port, lake and river.

Out of water  
**jet-skis**  
Ready to use  
Safe boarding  
Easy to use  
Maintenance free

### Focus Points

- Modular and extensible system without corrosion and maintenance
- Complete dry protection (hull and turbine out of water and sand)
- Easy machine maintenance (fuel filling)
- Boarding and debarking users out of water
- Easily assembly without gear intervention
- Highlight the machine, storage infrastructure (cost-efficient)
- Security : handling the machine on a stable support

MARINEFLOOR® JET SYSTEM is universal and can be used for every possible jet brands and models.

Due to its two half-sliders left and right, you can assemble your dock for one or several jets, in parallel, face-to-face or in series. It can be completed with an access pontoon, additional boat bases (rental bases), ...
